

James H. Willig, MD, MSPH is Professor in the Division of Infectious Diseases, Department of Medicine at UAB, and had served as Medical Informatics Director for the 1917 HIV Clinic and the UAB Health System Information Systems (HSIS). He currently serves as the Assistant Dean for Clinical Education in the UAB Heersink School of Medicine. Over the past decade, he has led efforts to build and implement patient reported outcomes capture software in clinical settings, mobile device software solutions to capture data outside of traditional healthcare settings, and has worked with his team to develop Kaizen Education a software platform aimed at leveraging principles of gamification and cognitive psychology to healthcare education.
